

## Dupont™ Plantex® Gold Installation guide

### Step 1: Preparation

Prepare the ground and rake if necessary. Ensure that the ground is free of rubble, sharp stones and weeds before laying Plantex® Gold to prevent damage to the fabric.

### Step 2: Roll out

Roll out Plantex® Gold. If several rolls are laid side by side, ensure there is an overlap of at least 10 cm.

### Step 3: Secure

Apply at least 2 pins per running. On large unplanted areas weigh down Plantex® Gold with stones or with the new plants to ensure that no movement occurs whilst planting through.

### Step 4: Cut

Using sharp scissors or a knife, make an "X-shaped" cut above an existing plant or in the spot where the new plant is to be placed.

### Step 5: Plant

Work Plantex® Gold gently over existing plants or plant through with new ones.

### Step 6: Cover

Plantex® Gold can be used covered as well as uncovered. If you use Plantex® Gold covered, apply at least a 5 cm layer of mulch e.g. bark, straw, gravel, decorative chippings etc.

Plantex® Gold is very strong, light and versatile, it will **last up to 3 years when used uncovered and 25 when covered**.

Our warranty\* is not valid if passage of or contact with machines and/or equipment has taken place, for which our products are not suitable and which have resulted in a possible degradation of our products.
